# Helper 9.1 Product Changes

## Welcome to Helper 9.1

### Helper 9.1 Includes the Following Changes:

#### New Features:

- Ability to sync Helper scheduler with popular external/mobile calendars
- Ability to Send Email Appointment Reminders
- Ability to mass-delete Diagnosis Favorites List

#### Issue Corrections:

- Per CMS specifications, removes decimal place from ICD-10 codes on HCFA 1500
- Corrects portrait / landscape printing issue on patient statements
- Fixes an issue with taxonomy when changing providers
